Las Palmas #16 is an end unit located within the Las Palmas Condos community. This means that from many vantage points within the condo, you can actually see the waves crashing along the shoreline. This is practically unheard of in Playa Guiones or Playa Pelada. This incredible 3 bedroom property features a large porch that one can sit and have coffee in the morning, while listening to the jungle awake or a cocktail late in the afternoon taking in the warm colors of a sunset. There is also a community pool that is available anytime you need to cool down during the warm days. A quick 1 minute stroll down to the beach to breathe in the salt air and to see the pelicans flying just above the crest of waves makes this a spectacular option for a second home or rental investment.
